What to expect with MOLAMAX POULTRY MICROBES

These microbes reduce mortality in chicks, speed up their growth and boost immunity of all birds.

Shorten the time broilers will take to attain slaughter weight.

Increase the laying percentage of layers and make them lay eggs with yellow yolk.

enhances digestion and improves feed utilization by birds and causes birds' droppings to be less and drier.

Helps broilers to improve their daily weight gain - Broilers on good quality diet attain slaughter weight of 1.5kg at 4 Weeks saving a farmer more than 11/2 weeks of unnecessary Feeding.

Note: their meat is tastier and less fatty with minimal Cholesterol levels.

MOLAMAX POULTRY MICROBES is a solution to ammonia pollution and a super organic way to fight aflatoxins in feeds and in birds that may lead to stuntedness in birds, laying tiny eggs, low laying percentage, compromised birds immunity and poor feeds utilization.

- Gives the day old - chicks a right start.
- Enhanced feed utilization
- Boosts immunity of birds of all ages
- Helps fights mycotoxins / aflotoxins
- Enhance laying for layers
- Shorten the slaughter weight period for broilers
- Eliminate ammonia smell in poultry house.

BATCH NO:Z/B/233800 BEST BEFORE: 2025

HOW TO USE
Put 5 Mls of molamax poultry Microbes in every liter of the Water that your Birds Take to realize the Above benefits

NOTE: NEVER USE IN WATER WITH CHLORINE AND CHEMICAL.
