C V MANDIZVIDZA

FOR: CHIEF DIRECTOR
VETERINARY SERVICES

B. HEALTH CERTIFICATE

I.....an authorised veterinarian

of the administration of.....do hereby certify that-

1. the day-old chicks / eggs for hatching originate from a poultry farm free from signs of infectious and contagious diseases;
2. the exporting country has not had an outbreak of Newcastle disease within a 10 km radius of the farm of origin for at least 30 days;
3. to the best of my knowledge and belief and after due enquiry pasteurellosis did not occur on the poultry farm during the previous 12 months;
4. day old chicks /eggs for hatching originate from a flock vaccinated against Marek's disease and show no clinical signs.
5. infectious laryngotracheitis did not occur on the poultry farm during the previous 12 months;
6. there is a salmonella reduction programme in place on the farm of origin and no evidence of *Salmonella Pullorum*, *Salmonella Gallinarum* and *Salmonella Enteritidis* is found on routine culture
7. The poultry flocks must be free from active highly pathogenic avian influenza and low pathogenic avian influenza.
 - a. the poultry flocks of origin are located in zones or compartments free from highly pathogenic avian influenza, and more than 50 km away from any highly pathogenic avian influenza outbreak in the country.
 - b. the flocks of origin are kept under confinement in houses protected against the entry of any wild birds.
 - c. systematic disinfection is applied to the hatching eggs prior to introduction in the hatchery
 - d. in the case of day-old-chicks, these are hatched and packed without contact with other chicks of different health status, poultry of other species or birds
 - e. the farm has not had any Avian Influenza outbreak in the last 12 months.
 - f. the hatching eggs are transported in new or appropriately sanitised containers.

8. duck virus hepatitis and duck virus enteritis did not occur on the poultry farm during the previous 12 months;
9. the poultry flocks from which the day old chicks/eggs for hatching originate, are vaccinated and free from clinical signs of *Mycoplasma gallisepticum* and *Mycoplasma synoviae*. There is an effective disease mitigation programme in place for *Mycoplasma gallisepticum* and *Mycoplasma synoviae*.
10. the farm has not had an outbreak of infectious bronchitis in the last 12 months. Eggs from where an outbreak has occurred will not be accepted.
11. day old chicks/ eggs for hatching originate from flocks that are vaccinated against infectious bursal disease.
12. the flocks of origin are vaccinated and show no clinical signs of egg drop syndrome (EDS)
13. Avian encephalomyelitis did not occur on the farm in the previous 12 months.
14. the hatching eggs and day-old chicks to be exported were also kept in isolation and have not come in contact with any other eggs or birds prior to export apart from those of a similar health status.
15. the eggs/day old chicks originate from premises free from foot and mouth disease and free from movement restrictions due to foot and mouth disease,
16. the eggs/day old chicks do not to the best of my knowledge constitute any risk of introducing infectious or contagious diseases into Zimbabwe.

.....
DATE STAMP

.....
SIGNATURE: AUTHORISED VETERINARIAN

NB. Day old chicks / hatching eggs must not come into contact with any other poultry or birds during the journey from country of origin to Zimbabwe.

A/Chief Director
Strategic Policy Planning and Business Development.

REF: DK HATCHERIES INC.

Please be advised that D K Hatcheries Inc. submitted an application to import 1 000 parent day old chicks from Zambia on the schedule dated 27/09/21. We issued them a vet permit for that consignment on 06/10/21.

They have since indicated that their supplier is adding an extra 170 chicks on that consignment to cater for transit losses. We have issued them another vet permit 115395 on the extras.

Kindly assist with the issuing of the Control of Goods Import Permit.

Kind regards,

Dr C V Mandizvidza
Veterinary Import and Export officer

For: CHIEF DIRECTOR VETERINARY SERVICES
