A BLURRED FINGER-PRINT HAS NO VALUE, ALL PRINTS MUST BE AS CLEAR AS POSSIBLE

- ALWAYS enter particulars of person on finger-printer form IMMEDIATELY AFTER taking his/her finger-prints. Do not take other prints until you have done so.
- ALWAYS use the correct ink supplied. DO NOT use ordinary ink on an inking pad for rubber stamps.
- Fingers must be clean and dry. If necessary person having prints taken must wash hands.
- If finger are badly worn, make smooth by using pumice stone, remove oil or tar with benzene.
- Use clean pad with no dust or old ink on it. Put ink on evenly - no lumps or blobs. Do not use too much ink (this is a common fault).
- ALL impressions must be in correct sequence to head of space where print is made, taken right down to the first joint of the finger.
- ALL impressions are to be taken by ROLLING the fingers or thumbs, thus: the person having the print taken must let his/her fingers go limp. Take each finger, with nail towards you, and roll on the paper so that the nail finishes away from him/her. CHECK prints to see that they are not smeared.
- Check the separate prints of each finger with the prints of all four fingers taken together and so make sure that you have taken the separate prints the correct order.
