Notes on how to take finger prints

A BLURRED FINGER PRINT HAS NO VALUE. ALL PRINTS MUST BE CLEAR AS POSSIBLE

- a) ALWAYS enter particulars of finger print form IMMEDIATELY AFTER taking his/her finger prints. Do not take prints until you have done so.
- b) ALWAYS use the correct ink supplied. DO NOT use ordinary ink pad for rubber stamps
- c) Fingerprints must be clean and dry, if necessary person having prints taken must wash hands.
- d) If fingers are badly worn, make smooth by using pumice stone, remove oil or with benzene.
- e) Use clean pad with no dust or old ink. Put ink on evenly – no lumps or blops. Do not use too much ink (this is common fault).
- f) ALL impression must be in correct sequence to head of space where print is made, taken right down to the first join of the finger.
- g) All impression are to be taken by ROLLING the fingers or thumbs, thus, the person having print taken let his/her fingers go limp. Take each finger, with nail towards you, and roll on the paper so that the nail finishes away from him/her. CHECK prints to see that are not smeared.
- h) Check the separate prints of each finger with the prints of all four fingers together and so make sure you have separate prints in the correct order
